

Emerson Wireless Applications

Smart Wireless allows you to engineer new applications and practices in your plant by **extending the full benefits of [PlantWeb](#)** to previously inaccessible locations and solving those "too-expensive-to-fix problems". With easy integration via HART protocol devices, you can use your imagination to go beyond the norm and uncover the exciting possibilities of Smart Wireless.

Asset Monitoring

Smart Wireless can help extend the life of your assets and better understand performance. Measurements can aid in moving to proactive maintenance programs.

- Bearings and Lube Temperature, Filter Differential Pressure
- Proactive Maintenance as Needed
- Trend Asset Performance
- Reduce "Surprise Shutdowns"

Process Monitoring

- Use Smart Wireless solutions to enhance the understanding of your process and identify opportunities for improvement.
- Find Cold Spots in Steam Lines
- Prevent Spills by Using Alerts
- Eliminating Clipboard Rounds
- Gain Valuable insight into Process

Smart Wireless Unparalleled Ease-of-Use

Let's face it, you have enough challenges without your new wireless technology being one of them. Customers we've surveyed state that "ease-of-use" is among their greatest concerns when it comes to applying wireless. We've heard you.

Emerson's Smart Wireless couldn't be easier. Based on more than 3 years real-world customer trials, we have developed a robust, secure wireless platform which is:

- Easy to install
- Able to unlock stranded diagnostics
- Integrates with existing data networks
- Guarantees future standard compliance

We call it "stress-free wireless solutions". You'll call it easy.

Easy Installation

The Emerson Wireless will automatically create a secure robust Smart Wireless network right out of the box.

- No site surveys
- No special tools
- Seamless integration with wired network
- Automatic scalability
- Guaranteed forward compatibility with industry standards (SP100, HART)

What is a SmartPack?

Getting started with wireless technology has never been easier. Emerson has developed a complete wireless automation kit you can order today. The **Emerson Wireless SmartPack™** starts with:

- ▶ Five Rosemount measurement instruments. You can choose any combination of wireless pressure, temperature, level and flow
- ▶ A secure, robust 1420 wireless communications gateway
- ▶ AMS Device Manager software for predictive diagnostics from your wireless devices
- ▶ SmartPack™ to help you with your first start up, including full network health assessment to ensure robust communications plus verification of device functionality through your chosen output (Modbus, TCP/IP, Ethernet, etc.)

Note: *The number of measurement transmitters is flexible. You may order more than 5 units and adjust the mix of pressure, temperature, level and flow.*

Request a SmartPack™ Quote

Simply call +30 210 4528256-257-258. You can specify how many devices and what combination of pressure, temperature, level or flow devices.
